## Technical Skills

### Server-Side Frameworks

Node  
npm

### Client-Side Frameworks

jQuery  
Lodash  
Bootstrap  
Handlebars  
Jade

### MVC

Backbone.js  
React  
Flux

### Testing Frameworks

Mocha  
Chai  
Jasmine  
Sinon

### Databases

NoSQL  
Orchestrate

### Version Control

Git  
GitHub

## Professional Experience

### Project Manager & Developer | [Portland Code School Project Team](#)

October 2015 - December 2015

Led an agile team of 3 junior developers, from inception to deployment, over a 5 week sprint. Brought out the best in my talented team members, despite our school's closure and version control challenges. Contributed throughout the stack, especially in MVC environment.

**Technical Environment:** Node, Express, Backbone, Handlebars, Orchestrate, Google Maps, Git

### Lead Developer | [PopSockets](#)

May 2015 - August 2015

Developed Shopify storefront for PopSockets, who make clever grips and accessories for mobile devices. Built templates & responsive client-side tools, & integrated designs from other PopSockets web presence. Emphasized modern web standards like Flexbox.

**Technical Environment:** Shopify eCommerce Platform, Liquid Templating Language, Bootstrap, JavaScript, jQuery

### Assistant Developer | [NorthWest Veg](#)

May 2015 - August 2015

Took over various small projects for lead developer at Portland non-profit devoted to making cruelty-free diets easier. Implemented complete restructure of legacy HTML - from table-based markup to semantic solution. Designed a

reusable tool for quickly making dramatic changes to the layout.

**Technical Environment:** Custom templating language, CSS3 / HTML5, Git

## **Instructor | University of Colorado, Boulder**

*August 2013 - May 2014*

Developed supplementary curriculum for intro philosophy courses of more than 100 students. Provided instruction and test prep for courses in metaphysics, ethics, history of philosophy, philosophy of science fiction, critical thinking, logic, writing, and others.

## **Projects**

### **Fetch!**

A single-page web application for tracking your lost pets, by crowd-sourcing community animal sightings. Built in a Node / Backbone / Orchestrate stack. Makes interesting use of the Google Maps JavaScript API, and a number of Node modules and client tools for image manipulation.

## **Education**

### **Full-Stack JavaScript 2015**

Portland Code School

### **Full-Stack JavaScript 2015**

[Treehouse Online Code School](#)

### **MA, Philosophy 2012-2014**

University of Colorado, Boulder

Emphasis in metaphysics, philosophy of language, & ethics.

Thesis: *Vagueness & Fundamentality*, 2014

### **BA, Philosophy 2009-2011**

Western Washington University

Paul J. & Rebecca Olscamp Scholarship 2009-2011.

Outstanding Graduate, 2011.

Vice President of Philosophy Club, 2010-2011.

## **Volunteer**

### **General Volunteer | [Mozilla ViewSource Conference](#)**

*November 2015*

### **PDXCode Community Event Coordinator | [PDXCode.community](#)**

*October 2015 - November 2015*

### **Speaker Rep & Volunteer Coordinator | [PyDX Python Conference](#)**

*October 2015*

## **Presentations**

### **Intro to Jade** | [Hack + Help](#)

*September 2015*

A presentation on the Jade templating library. Covered its merits, common pitfalls, and a live demonstration of the technology. Hack + Help was a regular meet-up and safe space for code newcomers to explore new tools and get support from Portland's tech community.

### **What is Vagueness?** | [WWU Undergraduate Philosophy Conference](#)

*April 2013*

A presentation and overview of the current philosophical literature on vagueness. Made a case for a novel new theory about vagueness and fundamentality. The Undergraduate Philosophy Conference at Western Washington University is among the most prestigious west-coast conferences for young philosophers.
