Orchestrate

Version Control

Git/GitHub

Experience

Project Manager & Developer | [Portland Code School Project Team](#)

October 2015 - December 2015

Led an agile team of 3 junior developers, from inception to deployment, over a 5 week sprint. Brought out the best in my talented team members, despite our school closing, an early dead-

end, and various Git-related challenges. Contributed throughout the stack, especially in MVC environment.

Technical Environment: Node, Express, Backbone, Handlebars, Orchestrate, Google Maps, Git

Lead Developer | [PopSockets](#)

May 2015 - August 2015

Developed Shopify storefront for PopSockets. Built templates & responsive client-side tools, & integrated designs from other PopSockets web presence. Emphasized modern web standards like Flexbox.

Technical Environment: Shopify eCommerce Platform, Liquid Templating Language, Bootstrap, JavaScript, jQuery

Assistant Developer | [NorthWest Veg](#)

May 2015 - August 2015

Took over various small projects for lead developer Eric Day. Implemented complete restructure of legacy HTML - from table-based markup to semantic solution. Designed a reusable tool for quickly making dramatic changes to the layout.

Technical Environment: Custom templating language, CSS3 / HTML5, Git

Instructor | **University of Colorado, Boulder**

August 2013 - May 2014

Projects

[Fetch!](#)

A single-page web application for tracking your lost pets, by crowd-sourcing community animal sightings. Built in a Node / Backbone / Orchestrate stack. Makes interesting use of the Google Maps JavaScript API, and a number of Node modules and client tools for image manipulation.
